Evolv Express

Evolv Express® uses advanced sensor technology and AI and is designed to enhance security, create situational awareness by alerting on potential threats, and support threat response with a "Red Box" directed search.

A single lane screens up to 2000 people per hour while a dual lane can screen up to 4000 per hour. Both systems can be used indoors or outdoors.

Evolv eXpedite™ AI X-Ray

Evolv eXpedite™ is designed from the ground up to detect concealed weapons in bags using X-ray imaging and AI that distinguishes many potential threats from many everyday items.
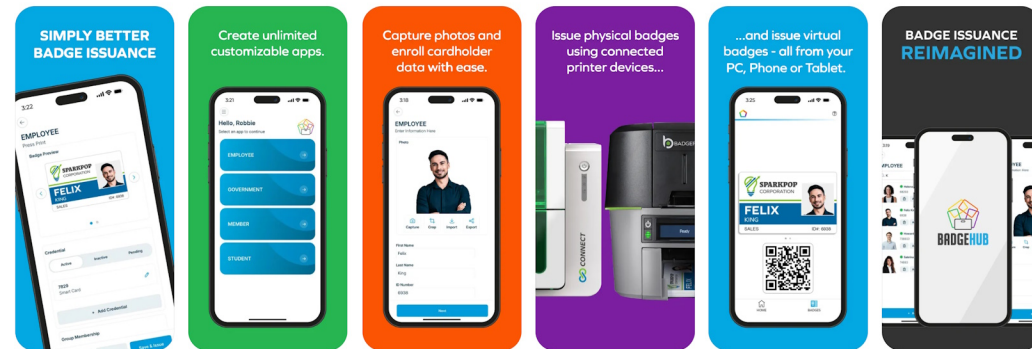

With Evolv eXpedite, security staff don't need to continuously monitor a computer screen to identify potential threats and determine whether to stop the belt or not. And they don't need specific training to interpret an X-ray image.

BadgeHub was designed with end user experience in mind. The platform is easily downloadable from the App store and allows any facility to create customized workflows and issuance rules for all their cardholders.

Gone are the days of antiquated badging set-ups limited to a single location in your organization. Enroll cardholder data, capture photos, and issue badges from any device, anywhere. Why should you have to choose between physical or the convenience of virtual credentials? Get the best of both worlds!

SIMPLY BETTER BADGE ISSUANCE · Create unlimited customizable apps. · Capture photos and enroll cardholder data with ease. · Issue physical badges using connected printer devices... · ...and issue virtual badges - all from your PC, Phone or Tablet. · **BADGE ISSUANCE REIMAGINED**

Design an unlimited number of badges and issue from any device, including your phone or tablet. Print physical cards or issue virtual badges automatically to a cardholder's phone. The choice is yours!

When new badges are issued to cardholders, they are automatically activated. More importantly, we ensure any lost badges are instantly deactivated when a replacement badge is provisioned, reducing the risk of credential overflow .

If you are issuing virtual badges, they can be instantly removed from the App as soon as a badge or user is deactivated. https://bit.ly/4jdjygy

Remote Photo
By CloudCard

1 **Create badgeholders with ease**
Sync RemotePhoto with your HR system onboarding or provision on the fly with Single Sign-On. Once created, you have the option to send out a welcome email for badgeholders to submit their photo remotely.

2 **Badgeholders skip the line and submit the photo they want**
Individuals submit photo via an intuitive user interface that works on any device. Our AI Helper Bot automatically crops, rotates, and removes the background of the photo in real time.

3 **Never touch an ID photo again**
Put approvals and denials on autopilot. Let our AI, HelperBot, do the work. Badgeholders are immediately notified if the photo will work for an id card. If AI isn't your thing, you can always process photos manually.

4 **The perfect ID photo for your badges.**
Automatically download photos to the file system or database (in .jpg format) for your card production, HR, or access control system to pick up. Use the quality ID photos delivered by RemotePhoto to create your badge or mobile credential.

BEST IN CLASS PRINTERS -we offer leading manufacturer brands in both Direct to Card and Re-transfer models. We can also offer Lamination and Encoding Modules to help secure and protect your badge.
