- Option 1: Engage with your design team & produce locally
- Option 2: Submit your order via Evolv's FastSigns portal at <https://express-panels.webflow.io>

Custom Graphic Panels Specs

New Gen 2 Specs

[DOWNLOAD TEMPLATE](#)

PANEL SIZE: 56.75" H x 23" W

BASE MATERIAL: White Polystyrene (.06 Thickness)

VENTING HOLES: The new 2.0 system does not need venting holes in the panels. However, specific screw holes need to be cut on either side of the panels to secure it to the system. Locations of the holes can be found in the template.

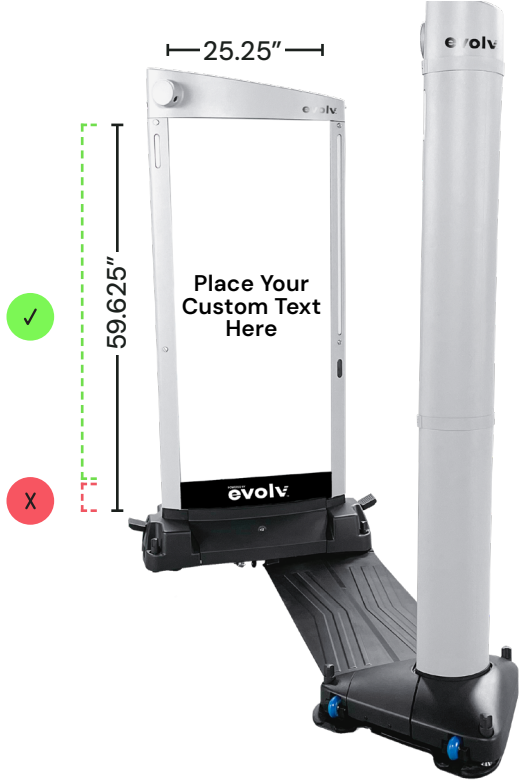

All custom panels must include black bar and Powered by Evolv logo at the base of the panel as supplied in the graphic panel template file.

Customer cannot design in the black section.

Not sure which system you have?
Find out on page 5.

Custom Graphic Panels Specs

Please see engineering drawings for exact location and dimension, or download the template.</p>		<p>PANEL SIZE: 59.38" H x 25" W</p> <p>BASE MATERIAL: White Polystyrene (.06 Thickness)</p> <p>PO does not need venting holes.</p>	

- ✓ All custom panels must include black bar and Powered by Evolv logo at the base of the panel as supplied in the graphic panel template file.
- ✗ Customer cannot design in the black section.

How to Tell If Your System Is P0, P1, or Gen 2

Look at the base of your system.

EVOLV EXPRESS® GEN 2

- If outer Rx towers have handles

EVOLV EXPRESS P1

- If the serial number is above 1000

EVOLV EXPRESS P0

- If the serial number is below 1000

Alternatively

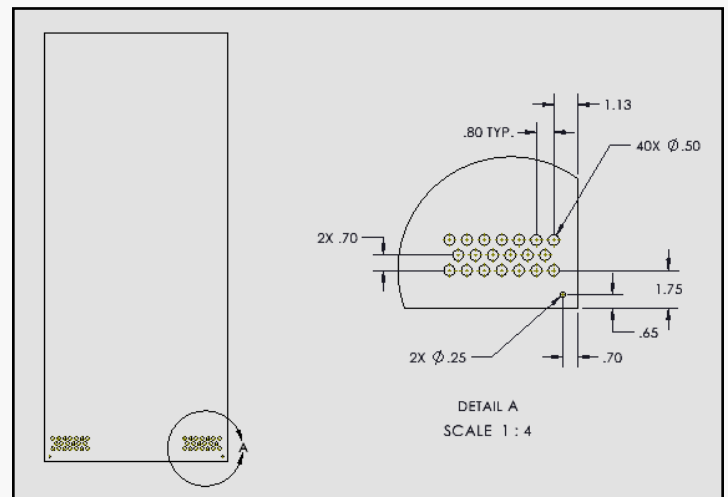

If you just did a software upgrade, it will show on the **tablet**.

Venting Holes for P1 Systems

Graphic Panel Artwork FAQs

How do I convert text to outlines in Adobe Illustrator?

When you are preparing your files to give to your local graphic vendor, we recommend you convert your text to outlines. This ensures that your font will not get replaced by a substitute, your artwork text will remain crisp, and your printed artwork will look exactly like what you submitted.

Please follow these steps to convert your text to outlines in Adobe Illustrator:

1. Select all of the text in your artwork
2. Click on "Type" in the menu options
3. Scroll down and select "Create Outlines"

If my artwork resolution is less than 300dpi, can I just increase it in Photoshop?

No. Your file must be at least 300dpi or vector art. If your artwork is less than 300dpi, simply increasing the resolution in Photoshop is not going to help. Unfortunately, it will only create a blurry image.

Can I pull images and/or my logo from our website to add to the artwork?

Typically, web images are 72dpi. This is too low for large format printing. We suggest placing original high-resolution imagery and logos into your artwork to ensure a crisp, high-quality graphic panel.
